

Test Key Calculation Instructions

1. Turn on the device:

- For a bank-issued authentication device – enter your PIN code.
- For Mobile DigiPass – tap the calculator icon and enter your password.

2. Select “Signature”.

3. Enter the requested parameters, confirming each one by pressing “OK” or “>”.

Example of Test key calculation:

3.1. For orders without an amount, assuming that the order contains the following information:

Order submission date: DDMMYYYY

Rietumu ID number (your Internet Bank user number): 123456

Enter the following parameters into the code calculator:

Account: current date – DDMMYYYY;

Amount: always enter 1;

Currency code: always enter 2;

Beneficiary account: your Rietumu ID – 123456.

3.2. For orders with an amount, assuming that the payment order contains the following information:

Account of the payer: LV00RTMB0000123456789

Amount: EUR 123456.78

Beneficiary account: LV00RTMB0000987654321

Enter the following parameters into the code calculator:

Account: the last 9 digits of the payer’s account – 123456789;

Amount: the amount without decimal places – 123456;

Currency code: according to the currency code table – 2;

Beneficiary account: the last 9 digits of the beneficiary’s account – 987654321.

4. The resulting digit combination is your Test Key and serves as the required signature for the order
